DNA Repair

Contents

Volume 315 (1994)

Research Papers

Involvement of RecF pathway recombination genes in postreplication repair in UV-irradiated *Escherichia coli* cells
Y.-C. Tseng, J.-L. Hung and T.-C.V. Wang (Taiwan) 1

Effects of arsenic on DNA damage and repair in human fetal lung fibroblasts
J.-T. Dong and X.-M. Luo (People's Republic of China) 11

Electroporation and streptolysin O — a comparison of poration techniques
A.N. Harvey, N.D. Costa and J.R.K. Savage (UK) 17

Effect of deoxyribonucleosides on the hypersensitivity of human peripheral blood lymphocytes to UV-B and UV-C irradiation
M.H.L. Green, A.P.W. Waugh, J.E. Lowe, S.A. Harcourt, J. Cole and C.F. Arlett (UK) 25

A comparison of the DNA-damaging, the cytotoxic and genotoxic properties of tetracycline in human fibroblasts in the presence and absence of light
I. Witte, G. Oetken, C. Buschfort and A. Hartmann (Germany) 33

Nomenclature of human DNA repair genes
A.R. Lehmann, D. Bootsma, S.G. Clarkson, J.E. Cleaver, P.J. McAlpine, K. Tanaka, L.H. Thompson and R.D. Wood (UK, The Netherlands, Switzerland, USA, Canada, Japan) 41

DNA repair in the genomic region containing the β-actin gene in xeroderma pigmentosum complementation group C and normal human cells
L.S. Barsalou, G.J. Kantor, D.M. Deiss and C.E. Hall (USA) 43

Stable expression in rat glioma cells of sense and antisense nucleic acids to a human multifunctional DNA repair enzyme, APEX nuclease
Y. Ono, T. Furuta, T. Ohmoto, K. Akiyama and S. Seki (Japan) 55

Biological inactivation of pBR322 plasmid DNA by enzyme- and radiation-induced single-strand damage under various conditions
Y. Ventur and D. Schulte-Frohlinde (Germany) 65

Conference Report

Recent advances in DNA repair, mutation and recombination. A Report of the Meeting of the British Photobiology Society, London, 20 December 1993
P. Strike (UK) 75

Research Papers

Excision of ultraviolet-induced photoproducts of 5-methylcytosine from DNA
M. Vairapandi and N.J. Duker (USA) 85

Somatic mutations at T-cell antigen receptor and glycophorin A loci in pediatric leukemia patients following chemotherapy: comparison with HPRT locus mutation
H. Hirota, M. Kubota, S. Adachi, A. Okuda, Y. Wei Lin, R. Bessho, Y. Wakazono, K. Matsubara, K. Kuwakado, Y. Akiyama and T. Tsutsui (Japan) 95

Mutagenesis resulting from DNA damage by lipid peroxidation in the *supF* gene of *Escherichia coli*
S. Akasaka and K. Yamamoto (Japan) 105

Hyperrecombination in pneumococcus: A/G to C.G repair and requirement for DNA polymerase I
F. Pasta and M.A. Sicard (France) 113
Induction of the genes *RAD54* and *RNR2* by various DNA damaging agents in *Saccharomyces cerevisiae*
D. Averbeck and S. Averbeck (France) 123
Sensitivity to nitrogen mustard in *Saccharomyces cerevisiae* is independently determined by regulated choline permease and DNA repair
Z. Li and M. Brendel (Germany) 139
Validation of a flow cytometric in vitro DNA repair (UDS) assay in rat hepatocytes
J.R. Selden, F. Dolbeare, J.H. Clair, J.E. Miller, K. McGettigan, J.A. DiJohn, G.R. Dysart and J.G. DeLuca (USA) 147
DNA damage and stress protein synthesis induced by oxidative stress proceed independently in the human premonocytic line U937
M. Perin Minisini, S. Kantengwa and B.S. Polla (Switzerland) 169
DNA double-strand break rejoining in *xrs5* cells is more rapid in the G2 than in the G1 phase of the cell cycle
S. Mateos, P. Slijepcevic, R.A.F. MacLeod and P.E. Bryant (UK) 181
Efficient synthesis of ^{32}P-labeled single-stranded DNA probes using linear PCR; application of the method for analysis of strand-specific DNA repair
H.J.T. Ruven, C.M.J. Seelen, P.H.M. Lohman, L.H.F. Mullenders and A.A. Van Zeeland (The Netherlands) 189

Erratum 197

Announcement from the Editors iii

Research Papers
Intracellular localization and function of DNA repair methyltransferase in human cells
T. Ishibashi, Y. Nakabeppu, H. Kawate, K. Sakumi, H. Hayakawa and M. Sekiguchi (Japan) 199
High-level expression of the photorepair gene in Drosophila ovary and its evolutionary implications
T. Todo, H. Ryo, H. Takemori, H. Toh, T. Nomura and S. Kondo (Japan) 213
The XPA protein is a zinc metalloprotein with an ability to recognize various kinds of DNA damage
H. Asahina, I. Kuraoka, M. Shirakawa, E.H. Morita, N. Miura, I. Miyamoto, E. Ohtsuka, Y. Okada and K. Tanaka (Japan) 229
Complementation of V(D)J recombination defect and X-ray sensitivity of *scid* mouse cells by human chromosome 8
S.S. Banga, K.T. Hall, A.K. Sandhu, D.T. Weaver and R.S. Athwal (USA) 239
Mutagenesis and epistatic grouping of the Neurospora meiotic mutants, *mei-2* and *mei-3*, which are sensitive to mutagens
C. Ishii and H. Inoue (Japan) 249
Repair of 6–4 photoproducts and cyclobutane pyrimidine dimers in *rad* mutants of *Saccharomyces cerevisiae*
S. McCready (UK) 261
A single amino acid change in *SNM1*-encoded protein leads to thermoconditional deficiency for DNA cross-link repair in *Saccharomyces cerevisiae*
E. Niegemann and M. Brendel (Germany) 275
Roles for the yeast *RAD18* and *RAD52* DNA repair genes in UV mutagenesis
J.D. Armstrong, D.N. Chadee and B.A. Kunz (Canada) 281
Cloning of human and mouse genes homologous to *RAD52*, a yeast gene involved in DNA repair and recombination
D.F.R. Muris, O. Bezzubova, J.-M. Buerstedde, K. Vreeken, A.S. Balajee, C.J. Osgood, C. Troelstra, J.H.J. Hoeijmakers, K. Ostermann, H. Schmidt, A.T. Natarajan, J.C.J. Eeken, P.H.M. Lohman and A. Pastink (The Netherlands, Switzerland, Germany) 295
